Commercial controls and open orders

Supplier onboarding

Erin Shaw owns onboarding. Before the first order, obtain identity and trading details, material specifications, payment terms, insurance evidence where applicable and the signed supplier code. Finance verifies any bank-detail change independently using an established contact. Bank account details and supplier portal passwords are held outside this register.

Product costs

Landed unit costs by product family appear in AL-MIX-01 and include planned inbound freight and handling, excluding VAT. Lead times begin at written acceptance and are not a promised customer delivery date. Packaging and trim suppliers support production and fulfilment; their materials are not counted as finished garments.
