ALDER & LOOM

Winter Edit launch & budget

MIXED / INTERNAL MASTER | AL-MIX-03 | Version 2.0 | 11 November 2026

Public-safe launch brief

Campaign

Winter Edit runs 5-19 January 2027 and features RH-200 Ridge Hoodie, HO-300 Harbour Overshirt, TJ-600 Trail Jacket, MC-510 Merino Crew and PC-610 Padded Coat. Messaging focuses on layering, fit and practical care. The announcement contains no guaranteed stock reservation.

Price and product claims

Reference current catalogue prices until a dated price update is approved. No campaign-wide discount code is authorised. Trail Jacket copy may say water-resistant, not waterproof. Merino Crew composition is 100% merino wool; do not extend this claim to other knitwear.

Customer journey

Campaign links lead to individual product pages with variant availability at checkout. Standard delivery remains free at GBP 75 after discounts. Returns follow the policy applicable at order placement. The campaign does not introduce a separate returns deadline.

Publication boundary

This page is approved for customer-facing extraction. Budget allocations, targets, supplier dependencies and sign-off details on subsequent pages remain internal.

ALDER & LOOM

Winter Edit launch & budget

MIXED / INTERNAL MASTER | AL-MIX-03 | Version 2.0 | 11 November 2026

Internal marketing budget and targets

Q1 allocation	GBP
Paid social	9,000
Photography and editing	3,000
Creator sampling and shipping	1,800
Email and landing-page creative	1,200
Campaign contingency	2,000
February-March always-on activity	7,000
Quarter total	24,000

Budget reconciliation

The January Winter Edit allocation is GBP 17,000; February-March always-on activity is GBP 7,000. The GBP 24,000 total matches AL-INT-01. Contingency must remain within this total and requires Theo Bennett approval before use.

Performance targets

Targets are 80,000 landing-page sessions, 2,000 attributed orders and 2.5% session-to-order conversion. Net attributed revenue target is GBP 90,000 excluding VAT after discounts and returns, equivalent to GBP 45 per attributed order. These are targets, not achieved results.

Attribution limits

Attributed sales overlap the company forecast and must not be added on top of Q1 revenue. Gross attributed revenue divided by advertising spend is not operating profit. Review paid-media efficiency alongside returns, contribution margin and available stock.

Winter Edit launch & budget

MIXED / INTERNAL MASTER | AL-MIX-03 | Version 2.0 | 11 November 2026

Internal delivery plan and release gates

Due	Deliverable	Owner
20 Nov 2026	Product and material checks	Nina Cole
2 Dec 2026	Trail Jacket receipt review	Owen Ellis
8 Dec 2026	Photography selects	Tessa North
15 Dec 2026	Landing-page build	Samir Vale
22 Dec 2026	Spend and stock approval	Theo / Maya
4 Jan 2027	Final availability and link checks	Idris / Samir
5 Jan 2027	Campaign release	Samir Vale

Stock dependency

PO-1043 schedules 90 Trail Jacket units for 2 December. This improves coverage but does not prove January availability. Idris Hale reviews sell-through, allocations and any quarantine before the 4 January release gate. Cloud Knit is not featured; its separate replenishment remains an operations matter.

Stop and review

Pause paid promotion of a product when sellable stock cannot support the advertised variants. Maya Reed owns launch approval; Theo Bennett owns spend approval. After launch, the team reviews conversion and returns weekly. A two-week revenue shortfall above 10% triggers the forecast review described in AL-INT-01.
